

TRANSPORTATION INDUSTRY

We specialize in electrical insulation materials and precision fabricated components for the Mass Transit and Rail sectors.

We can produce both high volume parts runs as well as precision prototyping.

Our materials exceed Flammability (ASTM E 162), smoke generation (ASTM E 662) and toxicity (SMP-800-C) transportation requirements.

We can supply parts from drawings and samples as well as collaborating with engineering departments at the design stage.

We strive to build partnerships with our customers by providing reliable service, quality work and efficient delivery.

Applications include:

Flooring systems

Third Rail covers

Side boards and Step boards

Insulating Shields/Covers

Insulating Brackets & Panels

Precision OEM parts

Precision custom replacement parts

Precision custom prototyping parts

Manufacturers and Fabricators of High Performance Plastics
